## Potentiometric Linear Transducer (Conductive Plastic)

Series SPR18

The SPR18 series is used in applications where a displacement sensor with spring-suspended probe is required.

- Linear potentiometer (conductive plastic) with almost infinite resolution
- Measuring lengths from 25 mm to 100 mm
- Long lifetime (20 million movements)
- With spring return
- Compact dimensions

The transducer has a stainless steel ball in the probe tip, for example for scanning profiles or for monitoring distances.
